Hi Dave,

The property managers are Mark Matasovsky (612-968-1144) and Jim Amos (612-378-1144).

mark@matcominc.com

jim@matcominc.com

For our meeting tomorrow, do you want to gather at the Barr field office at the site (Building #1 in the NW corner of the site) – then we can walk to the stripper tower and other areas of the property? Building is heated and entrance is on the south side of the building.

Let me know if that works for your team.

Thanks,

Larry

Subject: RE: 5YR Site Inspection

Larry;

Thanks for getting back to me. We anticipate that the site inspection will conclude at approximately 12:00. After that we plan on conducting some of the interviews that Brenda referenced in her previous email. The interviews will be one on one questions and answer sessions scheduled with the individuals. So while the property managers may not need to attend the site inspection we would like to take the time to get their perspective. So if you have contact information perhaps you could forward that to me so we can schedule some time with them.

Subject: RE: 5YR Site Inspection

Hi Dave,

I spoke with the property managers and told them we would be on site Thursday, but I did not ask them to join us. Is there a reason they need to be there, too?

How long do you anticipate the site visit will take?

Thanks,

Larry

Subject: 5YR Site Inspection

Larry/Brenda,

We are scheduled for the General Mills Site Inspection for 9:00 AM on Thursday. I would like to follow up on a few details:

1. Larry, were you able to contact the property manager? Will he be able to participate in the Site Inspection? Are we clear for property access?
2. Plan on meeting 9:00 AM at in the General Mills Parking lot on the corner of 21st and Hennepin Avenue;
3. The list of attendees that I have for participating in the Site Inspection include:
 - a. Larry Deeney, General Mills;
 - b. Jim Amos or Mark Matasovsky Property Manager;
 - c. Sara Ramsden, Barr Engineering;
 - d. Shawn Lyman, BayWest;
 - e. Brenda Winkler, BayWest;
 - f. Tim Grape, BayWest;
 - g. Leah Evison, EPA
 - h. Ricardo McCurley SECIA;
 - i. Fred Campbell, MPCA;
 - j. Dave Scheer, MPCA;
4. Brenda will provide handouts for the 5YR team; Barr does not have any groundwater data more recent than the November 2013 report. A Geo-probe study was recently completed to delineate the extent of the groundwater plume but the analytical data is not expected to be completed before the Thursday site inspection.

Please let me know if there are changes in attendees from what I have listed. If not I will forward to the rest of the group.
